NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

On 06/15/2012, approx 1:30 pm, I was making a soft field turf landing at QW3 using runway 01. I kept the plane's weight off the main wheels longer than usual which resulted in a longer roll-out crossing runway 28-10 and proceeding downhill on other side. At that time, a John Deere 6430 Premium tractor entered my runway from left to right. I did not have enough ground speed to apply full power to avoid hitting the tractor. I turned the plane to the right to avoid "T Boring" the tractor. The front of my left wing tip hit the right frame of the tractor leveler causing the wing to buckle into the door on the pilot side of the plane. The left rear passenger side of the plane was damaged. I did not see any damage to the tractor and no one was hurt in the accident. No passengers were in the plane.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The operator of the tractor did not look for my plane landing. It is standard practice to look for traffic whenever entering or crossing a runway.
