

MEMORANDUM OF RECORD

Shawn Etcher
Air Safety Investigator
Eastern Region Aviation

September 27, 2012

Subject: ERA12CA547 – Airport Weather from FAA

Time of Call: 1345 EDT

Persons on the phone call: Sidney Villines (FAA) and Shawn Etcher (self)

During this phone call Mr. Villines was asked if the airport had any weather reporting capabilities. He stated that it did have an AWAS however, due to the system's ability it could not be printed off but he could view the recorded history. At the time of take off the winds were 320 degrees at 23 knots with a peak wind of 27 knots. He further reported that due to the computer screen a photograph was not possible.
