NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

I departed KOWD at around 13:00 for KACK. On very short final to runway 15, I extended full flaps and experienced power loss. I diverted my attention to the inside of the aircraft to try to correct the problem, swapping tanks nothing helped. When I looked outside I was in a very rapid decent with the ground approaching fast. I flared with all the power I had and touched down on the grass short of the runway. The aircraft rolled up onto the runway and I turned off on runway 24. I started the engines and taxied to my tie down.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

Have more than minimum fuel upon arrival. Visually insure that the auxiliary boost pumps are on. Wait until over the runway to apply full flaps.
