NARRATIVEReporting Officer: [REDACTED] - **KING, GEOFFRY**

On 102812, I FTO G King along with SGT R Stoffle, responded to both Top Road and [REDACTED] in reference to a possible plane crash. Upon arrival, Sgt Stoffle checked the area for an address reported to be the location of those persons who were involved in the crash. He also checked for the possible wreckage for the plane to check for unreported victims. I responded to Top Road also to check for the plane wreckage. I was able to locate downed power lines and followed them to the site of what was left of the plane where the fuselage was partly on fire. I then checked the immediate area for possible victims of the crash. Sgt Stoffle arrived on this scene shortly after and he advised to go to the address reported as the location for the crash survivors. I responded to [REDACTED] and located the five (5) members of the Saltsman Family who were on the plane when it crashed. The family members all showed signs of injuries, but Mrs. Saltsman had the most severe injuries and was being attended to by medical personnel. Mr. Saltsman was alert, but he requested to accompany his wife in the ambulance to the hospital. Alyssa Saltsman reported she was a legal adult so inquiries of the personal information for all parties were obtained from her. She did make a statement as to the events leading up to and after the crash. She stated the family had flown the plane, a possible Piper Saratoga single-engine craft from their home in Florida and had arrived on 102512 with plans to stay for a long weekend. She stated they left the local airport located in Sevierville and were still climbing in altitude when there was a warning alert within the plane stating "Warning Terrain" which she believed occurred three (3) times. She stated shortly after the alert there was a loud sound followed by a physical jolt to the plane. At some point the plane veered sideways and then came to a stop suspended almost upside down in the trees. She stated the family members were hanging being held by their seatbelt restraints. She stated her mother struggled loose and somehow became dislodged from her seat and fell from the plane an estimated fifteen to twenty five feet (15-25) landing on the ground below. She stated her father continued to try to free himself from his restraints when the plane became dislodged and also fell to the ground. She stated the plane at some point caught fire and was burning, but she was not sure how long it had been when it landed on the ground. She stated her father was able to get himself free and then got everyone else out of the plane and clear from the wreckage. There was a house very close to the site so they checked for the homeowners but no one was there so they eventually ended up at the [REDACTED] address where they did find the homeowners present. Medical personnel arrived at this location and were treating the various injuries upon my arrival. Mrs. Saltsman was transported to the University of Tennessee Medical Center for treatment to her injuries accompanied by her husband. The three (3) children were also transported to UT with only the younger male child having injuries needed for treatment. The Sevier County Sheriff's Office did secure the scene of the crash for safety and security reasons until released by the authorities from the FAA.

The report of the possible plane crash was received from authorities at McGhee-Tyson Airport and forwarded to the dispatch of the Sheriff's Office from Central 911 in Sevier County. Authorities from the Sheriff's Office, Sevier County Medical Ambulance Service, Waldens Creek Fire Department, Sevier County Rescue Squad, and Sevier County Electric were notified along with other supporting agencies in case their efforts were needed. Sgt Stoffle did speak with authorities from the National Transportation Safety Administration (NTSA) and Federal Aviation
