

MEMORANDUM FOR RECORD

Jay Neylon
Air Safety Investigator
Eastern Region Aviation

Date: March 15, 2013
NTSB Accident Number: ERA13LA167
Email received from: Wayne Vohs, Aviation Safety Inspector, Greensboro FSDO

Narrative:

"Mr. Haley (FAA Inspector) and I (Wayne Vohs) interviewed the only witness, Mr. Aaron Bunn, the airport line man on duty at the time of the accident. Mr. Bunn wrote a very brief written description of the accident. During the oral interview with Mr. Bunn, he described the aircraft coming in on final to runway 36. The aircraft had the landing gear up. He said the pilot was making a low pass when he heard the engine noise reduce "like when a pilot pulls off the power and is about to land." He stated the aircraft at this time made a climbing right banking turn followed by a steep banking turn to the left and then crashed.
