Narrative:

On 03/16/13 at approximately 0951 hours, I responded to a report of an ultra-light aircraft crash. The reporter was the pilot Anthony Radelat.

The Communications Division obtained GPS coordinates from the 911 cell phone call. I entered those numbers into my GPS unit and it showed the crash site to be southwest of Lake Trafford.

I traveled as close to the plotted crash site as possible and then walked into the wooded area. The GPS coordinates were not accurate and the plane and pilot were not located there.

I coordinated my efforts with road patrol deputies, the CCSO and Medflight helicopters as well as EMS and fire department crews.

We continued to search. By speaking to the pilot via cell phone were able to locate him ask him when the helicopter was getting closer or farther away. We used these questions and answers to direct the helicopter to the pilot. The injured pilot could hear the helicopter hovering over him, but the flight crew were unable to see the crashed ultra-light. The trees and vegetation were very thick and made it difficult to see from the air.

We had the helicopter hover over the crash site and we began to try and walk

Narrative:

through the dense vegetation to the helicopter. When we got close, I directed the helicopter to leave the area momentarily so we could hail the injured pilot and walk to the sound of his voice. This proved successful and the pilot was located.

Upon locating the injured pilot, he was extricated from the plane and placed on a backboard. He was carried out of the wooded area to an open are in the adjacent marsh. He was placed in the bed of a sheriff's Office 4X4 truck and driven to the awaiting Medflight helicopter. He was declared a trauma alert and flown to Lee Memorial Hospital for treatment.

I was contacted by representatives from the FAA and NTSB. At their request I took photographs of the crash site and plane. I gave them the GPS coordinates to the actual crash site.
