Statement of Dorothy Mahrie

I was standing in the POA office speaking with Karen Lewis, the General Manager when I heard and saw the plane traveling down the runway at high speed, looked like about 40-50mph. When it hit the end of the tarmac at the end of the runway the plane turned sideways with the nose of the plane pointing generally southwest towards O&W's Restaurant. I watched it slide off the end.

I immediately called 911 to report a plane accident – did not see any smoke or flames. I also contacted the gate to have them open the gates to allow emergency vehicles to pass.

Mark Hamiter, the Operations Manager, walked into the office and I told him a plane just went off the end of the runway. He immediately ran out of the office.

Prior to the accident I heard a pilot on the Unicom state he was going to do a fly-by to check the wind before landing. (Assume it was the plane in the accident since there was no other air traffic).
