NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

Departed KHEZ on clear day flew direct to T-36 at 3,000 ft. Overflew field to verify wind, entered Left downwind for RW 18.

Turning final determined I was slightly fast and high.

Executed a go-a-round. On second attempt, on short final recognized that I was lower and slower than anticipated, added power and as the turbo-charger lagged the stall horn sounded.

Aircraft impacted the ground approximately 20 feet short of the North end of the intended runway. Aircraft bounced to right side of runway. I attempted to maintain straight ahead directional control immediately beside the runway during rapid de-acceleration. Aircraft came to rest perpendicular to the runway facing West on an embankment approximately halfway down the field and 30 feet off the runway.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Earlier recognition on final of a low approach and speed decay.
