Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

There was no damage to other aircraft or property. Damage occurred to the canopy, left front fuselage, at least one wing and to the rear area of the fuselage. Note that pictures were taken at the scene by the NY St. Police, Rick Lafford, 585-444-6213 and Ted Timmons, 585-737-3623. The airplane will be investigated this week by Bill Abbott (FAA), 315-378-7255 and by Kevin Olsen (Insurance Co) 718-748-0560.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I released from my aerotow on 9/07/2014 at approx. 2:45 pm EST. My plan was to soar from Dansville, NY (KDSV), south, along the west side of the 390 interstate and land at Corning Painted Post, (7NI). The temperature was 75°, with scattered cumulus clouds. The cloud base was 5,500'. The wind was from the S/W at 9 KT.

The variometer reading was a steady plus 3 1/2 - 4 1/2. My "back-up" landing locations were AVOCA and JOHANTRA. I identified each of them during my flight to 7NI.

Though my plan was to land at Corning Painted Post, when I arrived there, the lift increased, so I changed my plan and decided to soar back to KDSV.

With the sun beating against East ridge, and the wind to my back from the S/W, it made sense to fly along the east side to the 390 valley.

As I approached Bath, N.Y., my lift declined from +4 to plus 2. As I approached Avoca, NY, my lift decreased to 0 (zero). I reached Avoca at about 800-850 AGL. I knew that the south end of the airstrip stopped where the (south) exit, 390 Avoca off ramp was located. Because of a row of trees existed between the air strip and highway 390, I was unable to see the black top runway from my vantage point. Seeing no reasonable landing place where I was, I crossed Rt. 390 and hoped to find the landing strip. My altitude was very low, and I still could not find the runway. So I attempted to land at a grassy area straight ahead. As I approached the grass, I saw a rise (small hill). I turned sharp left (south) to avoid a head-on collision. My wing struck and I stopped.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

Two weeks prior to my accident, thermal flights often lasted until 6:00pm (even 7:00pm). The angle of the sun on 9/07/2014, ^{however,} was significantly less strong. Lift died early. After my plane landed, I called Chuck Zabinski. The lift for him at DSV has just died also.

I should have been more aware of the lower sun and the resulting consequences of shorter flight time.

The accident would not have happened if I had landed at Corning Painted Post, as planned.
