At approx. 10:00AM on 7-28-2014 I observed the yellow and white Script airplane of Charlie Yaegle take off from the Flying A Ranch in an easterly direction. The engine RPM's were low but steady. The airplane was less than 200' when it banked left. Engine RPM's never changed. The airplane stalled and left my line of site in the marsh. I called 911, ~~put~~ lowered my boat into the water and went to the crash scene. Mr. Yaegle appeared to be alive but did not respond to my touch or voice. His eyes were closed. His torso and head moved forward & backwards several times. ~~I admini~~ When this stopped, I administered chest compressions but had no response.

CP watched Charlie at the end of his driveway. Running up his engine. Then a little after 10 AM CP watched him taxi out. CP heard him in the air.
