The Flight.

I took off from FSO at 10:30 am and headed south to 44N Sky Acres to fuel up. The landing there was a little rough but not bad. After getting fuel I headed south and transitioned under NYC class B down the Hudson river. After that I headed west and overflew FDK to avoid the TFR around Washington D.C. and avoid P-40 I assume over the Pentagon. I continued west deviating around some clouds to remain VFR. I climbed up to 8500 above the clouds. Not getting the fuel burn I was told to expect. I started listening to ATIS reports and found PBX as having a good ceiling and an ILS approach. I elected to proceed there. I contacted Indi Center and requested the ILS approach into PBX and was vectored to the localizer. I didn't declare an emergency. I was getting established on the localizer and was cleared to switch to the CTAF I had accidentally put the ATIS freq in instead of the CTAF so while I was moving the plate on my iPad back up to the frequency portion I accidentally closed the plate. I overshot the localizer and became momentarily disoriented. Recovering I managed to get the approach plate back up on my iPad and finally got established on the localizer and the CTAF input into my radio. by that time I heard PBX calling to see if I had gotten established on the localizer, they were alerted by Indi Ctr. At that time I was on localizer and approaching glide slope intercept and I flew the rest of the approach just fine. I broke out of the clouds around 3 miles from the airport. Exactly where I was supposed to be. I descended on the PAPIs and as I crossed the threshold I pulled my power back and started to flare and I felt the plane balloon up slightly then stall and drop around 15 feet down to the runway. The nose gear collapsed, I pulled the mixture to kill the engine. the plane was sliding in slightly a diagonal direction toward the side of the runway. It had nearly stopped but proceeded off the runway surface. Once the nose wheel hit the soft and muddy grass it dug in and the plane went up and over it's nose onto its top.
