

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Newport State: RI
 ZIP: 02842 Country: USA
 Latitude: 41-31-56.7831N Longitude: 071-16-53.5582W
(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 03/08/2015 Local Time: 11:30 (approx)
mm/dd/yyyy Time Zone: EST

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N65645

Manufacturer: Cessna

Model: 172P

Serial Number: 17275797

Year of Manufacture: 1983

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Make:
☐ Original Design

- ☐ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: 2400 lbs

Weight at Time of Accident/Incident: 1840 (est) lbs

Number of Seats: 4 Flight Crew Seats: 2

Cabin Crew Seats: Passenger Seats: 2

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

NOTAMS (D and FDC), AIRMETS, SIGMETs, PIREPs in effect at the time of the accident/incident:

As best as I can recall, the only applicable NOTAMS in effect were for the destination airport of UUU. These NOTAMS were in relation to sign obscuration caused by accumulated snow.

****Please note that for certain questions above: Temp/Dew Point, Visibility, Altimeter Setting, etc... I unfortunately do not recall the specifics.

DAMAGE TO AIRCRAFT AND OTHER PROPERTY		
Aircraft Damage ☐ None ☐ Substantial ☐ Minor ☐ Destroyed ☒ Unknown	Aircraft Fire ☒ None ☐ Both Ground and In-Flight ☐ In-Flight ☐ Fire at Unknown Time ☐ On-Ground ☐ Unknown	Aircraft Explosion ☒ None ☐ Both Ground and In-Flight ☐ In-Flight ☐ Explosion at Unknown Time ☐ On-Ground ☐ Unknown
Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> I am only aware of the visual damage that occurred. Prop ends were both bent due to contact with ground. Nose wheel was removed at the fork, with each side of the fork still attached to the wheel. Front strut remained intact to the belly of the plane. There was also a dent on the right wingtip. Unsure how the wingtip was affected as I do not recall it striking the ground. Possible chunk of ice hit this wingtip as the plane impacted a snowbank. I am not fully aware of what further damage subsequent investigation has revealed.		
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i> Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. Departed 4B8 around 1030 am after a full weather check and preflight. VFR conditions sufficient to continue solo and cross country requirements. Departed to the south until Long Island Sound and then turned east towards RI. Uneventful flight. Verified UUU winds on ASOS about 20 miles west of UUU. Winds at 200 so runway 22 was selected. I radioed Newport traffic about 10 miles west, then again on the western side of the bay. Stated intentions and entered pattern on the downwind of runway 22. There was no other traffic in the pattern. Normal left pattern entry at 45 degree angle. Normal base and normal final. I stated my actions over the CTAF for each position in the pattern. On final the airspeed was approx. 67 knots with 30 degrees flap and initial touchdown as normal. At first touchdown there was a slight balloon, but nothing too extreme to cause concern as plane was aligned properly and speed was decreasing appropriately. A secondary small balloon occurred within acceptable limits and I eased off the back pressure slightly in attempt to protect the nose gear while reducing the balloon. It was either the third or fourth balloon that turned into a much larger jump resulting in the front end pitching up suddenly while the plane cut quickly to the left. Unsure what caused the hard left movement. As the plane veered left it contacted with snow bank on left side of 22 at the intersection of the two runways. Lost the nose wheel and the plane pitched forward and slid about 20 feet to a stop. Immediately cut the fuel selector off, the master switch off and the ignition off. Attempted to radio UUU Unicom to determine next steps but received no reply so I exited the airplane. Airport manager (?) was parked in a plow vehicle at the north end of 22 and was the first to come over. The front wheel was located in the area of the impacted snow bank about 20 ft away from the stopped plane. I picked this up and brought it over to the plane as at this point the airport was still in operation and it was causing an obstruction to the runway. The front wheel was sheared off at the forks, with both the right and left fork pieces still attached to the tire. The tire was inflated and the main strut was still attached to the belly of the airplane. Emergency vehicles arrived, reports were taken and plane was towed off to the maintenance hangar in UUU. Steve (my instructor) arrived to pick me up shortly after and returned me to 4B8. Conditions of runway: Asphalt cleared of ice and snow with snow banks approx. 3-4 feet on either side spanning the full length of the runway. The snow banks rose on either side from the asphalt itself and no grass border was visible at the edges of the asphalt runway.		

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation
