DAMAGE TO AIRCRAFT AND OTHER PROPERTY

Aircraft Damage

- ☐ None ☐ Substantial
☐ Minor ☒ Destroyed
☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Left wing deformed. Landing gear torn from airplane, prop and engine torn from airplane, wind screen and canopy shattered. Two divets from sod on left side of 09.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Flight to destination was altered due thunder storms and lightening. This resulted in an approximate 30-45 minute delay in arriving at 7FL4, Haller Airpark. An alternate was selected, 28J, with a longer runway and asphalt surface and lighting. On first traffic pattern I was too fast and elected a go-around. Second approach was under better control and I elected to touch down with a 3 point landing. My airplane does not have a landing light and I misjudged my rate of descent. I bounced into the air, I estimate 3 or 4 feet. On the second bounce I decided to attempt a go-around and perform a wheel landing on the next attempt. I applied full Throttle and full right pedal. The aircraft changed its heading 45° to the left and executed a left roll. I couldn't stop the roll with right pedal and right stick to control the roll rate. The left wing tip made contact with the sod and then the aircraft cart-tipped with the prop and engine making contact with the ground. The prop and engine separated from the aircraft. The aircraft arrested upside down cracking the wind screen and canopy. The roll bar was on the ground and gave me about 10-14" between the gunnels and ground. I tried to turn ignition, master switches off and close throttle and mixture levers off. I tried to turn fuel valve selector switch to off. I spent 20-30 minutes getting out and the walk 1/4 mile to alert 911.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

make sure you have a landing light before attempting a night landing.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
