

On the morning of 7.11.15 at 6:15 I proceeded to take off from Genesee County Airport (GVQ) in my Challenger 2 Experimental Light Sport Airplane. The sky was clear, the temperature was 57 degrees with a 7 knot wind out of the South West. I went around the pattern three times and planed to do only touch and goes. The first landing was ok. The second landing I hit hard. I was able to fly the pattern once more. The third landing was hard as well and must of damaged the nose wheel at that time, I bounced cleared the runway lights and ended up near the windsock.
