Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

aircraft totaled from impact to tree, electrical wires and ground. other property was the yard at 225 Simpson Ln, Junction City, Ky and damaged side of house with fluid. The electrical wires came down and hit neighbors car window breaking the drivers door window at 219 Simpson Ln. About 5 electrical wires were cut and at least one tree had broken branches.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

After flying from KCFJ for 1 hour and 35 minutes I attempted normal landing in left hand traffic pattern, as I flared for touch down the aircraft climbed and my airspeed was low so I added full power for a go around. The aircraft was climbing out normally and at 500 ft began to cutout. Believing it was too late to land I started pumping the wobble pump which didn't seem to help. I made sure mixture was rich, and as power cut out I banked left and looked for place to land and seconds later was on the ground. KDVK was my planned fuel stop. I estimated 45 minutes fuel remaining. The aircraft has a throttle body injection fuel system.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

Spend more time getting familiar with aircraft fuel system. Aircraft had a throttle body injection system that replaced pressure carburetor with little control over mixture. I did not know exact fuel burn rate, estimated at 12 gph. Also has a flop tube system in tank. Would have recommended a shorter legs on trip to get good idea of fuel burn.
