☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Most of the damage was sustained by the wing acting as a shock absorber, and one bent strut on the carriage. One blade on the composite propeller was broken as well.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After performing several of the practical exam maneuvers successfully, Mr Wallace said to reduce the throttle to idle and find a place to land. A line up for landing was successfully completed, when Mr Wallace said to power up and go around. At this point I started to turn and attempted to power up the engine, but the engine was "loaded up" due to the prolonged idle and did not respond. The attempt to turn back and actually land was not successful.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Clearing the engine by tapping the throttle periodically on the way down would have prevented this.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
