Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

N5277 was turned up side down.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 8-13-2015 at approximately 10:50 AM, I landed N5277 a G164A Agcat in Trenton, NC at Jean Powers airstrip. When I safely had all three wheels of the tail wheel airplane on the ground I applied the brakes to stop the plane. When I did so there was no stopping force that transferred to the ground. I then released the brake peddle and reapplied brakes again. The brakes on the airplane locked up and the airplane cartwheeled in a forward motion to its final position being upside down.

I would like to point out that the statment that I emailed had the incorrect date on it. The statment above has the correct date.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Brake system was checked pre and post flight and no defects were found.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

The brakes did not work after landing and then locked up the second time I applied the brakes.
