I departed Morristown airport (MMU) and flew to Butter Valley (7N8) and made one full stop landing. I then departed once again from Butter Valley. Upon climb out, at approximately 800 feet AGL, the engine sputtered and the tachometer read no more than 1500 rpm. I attempted to land straight ahead, however I saw that there were power lines in my way, so I executed a descending left turn. I could not make it back to Butter Valley, so I elected to make an off airport landing in a nearby field. The aircraft's landing gear struck a small fence, causing the aircraft to flip. After the aircraft came to a stop, I secured the aircraft and exited the aircraft and sought help from responding civilians. I was transported by EMS to a local hospital and was treated for injuries to my arms, legs, elbows and head.
