Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> Aircraft suffered substantial damage during landing to propeller, fuselage and empennage.		
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. Level flight 7000 AGL, tops 6500-7000, completed turn at YANSKY intersection to KOWB, after completion of turn a large bang and the engine running rough, declared emergency with Fort Campbell ATC, who I had been with for a time, and asked for nearest airport. Before completing declaration, second large bang with parts exiting top cowl, oil coming up windshield, I immediately initiated the POH emergency procedure for engine failure. Fort Campbell responded Dawson Springs 8M7 and asked for intentions. I asked for vector, Fort Campbell said SouthWest. I asked for 3 digit vector. I found 8M7 on GPS and corrected heading. Fort Campbell said there were two approaches, 36 and 18. I said I would take 36. Dropping below 2000 feet, I called Fort Campbell again, no response. Broke out of clouds at approximately 1800 feet, looked for runway, could not locate runway, chose landing spot and setup for forced wheels-up landing off-airport.		

Operator/Owner Safety Recommendation

I was unaware I was being directed to a grass strip. Hearing the airport had two approaches gave me the feeling I was looking for asphalt, this was not the case. I also never received a status update from ATC as to what they saw of my position from their perspective. Therefore, there needs to be an improvement in the description of the airport and dialogue on what ATC sees in the position of the airplane to the airport.

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
Engine, Continental, TSIO-360-FB, s/n: 237325-R, inflight mechanical failure.
