Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Aircraft Came to Rest in Cedar Trees After Crossing Fence (White Wooded)
 Damage to Wings & Fuselage.

NARRATIVE HISTORY OF FLIGHT (Please type or print in Ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

13:15 Flight from KAPT, Jasper, TN - KMAC, Macon, GA Downtown.

Preflight showed 23 gallons on board and fuel selector on both tanks, with an estimated fuel burn of 7.5 gph. The flight was calculated to be duration of 1:45 with a 3-5 kts tail wind. The airplane showed 5.25 quarts of oil and oil was added to show 6 quarts.

The flight was planned for 5,500'. Nearing the destination; cloud cover was scattered at 3,500' feet. The flight level was lowered to 2,500' feet. The engine (shortly after) stopped producing power. I trouble shot the engine and pitched for best glide. The throttle was non-responsive as well as changes in the mixture setting. The pilot, focused on flying the airplane and attempting to make a safe off-field landing. The surrounding topography was planted pine trees. I found two fields for an off-site landing. The first field was terraced and would be unsuitable for landing. The other field was adjacent and of a good size and grade for an off-field landing. I set up for final and landed the aircraft. The airplane came to rest at a white fence. The occupants: pilot, passenger, and an 80-100 pound dog, were uninjured. Emergency response personnel were notified by telephone upon landing.

Probable cause: The fuel selector was moved off both tanks during flight by the animal onboard.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The fuel selector was found to have been between "Both" and the dry tank.
 The fuel selector was too easily moved from a "Both" indication.
 I did not realize the dog had/could dis-lodge the fuel selector.
 - Maybe a safety cage for the selector? -
