Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Aircraft flipped over

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

- Entered pattern with a tear drop entry
 - landed long due to another airplane taking the field while on final
 - There were 3 additional aircraft in line waiting to take off
 - Made decision to keep up speed on runway after landing in order to exit quickly
 - Misjudged speed due to wide runway and extension built on a downward slope that created an infinity pool effect
 - Did not visually see end of runway come up clearly
- Other circumstances
- Landing flaps were still in down position, combined with high speed made brakes less effective (skipping)
 - High speed was also combined with elevator in up position
 - After landing kept nose ~~strut~~ strut extended
 - Due to centering at extended position prevented from steering with nose wheel
 - Resulted in ~~over~~ runway overrun and subsequently flip over on right side of embankment

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

- Keep taxi speed even on runway at slow speed and recognize fault of too fast due to wide view of runway
- Recognize m.f.n. ty illusion with downward sloping runway end
- Raise flaps to achieve maximum braking
- Recognize no nosewheel steering available in a/c's with nose struts fully extended
- Recognize the runway is mine until I exit and do not get pressured into expediting off of runway by other traffic
