Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Engine inoperative; right wing spar snapped and right wing bent upward outer third, empennage twisted, prop bent, nosegear sheered off, left gear punctured through top of wing, right gear broken

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After receiving DUATS weather brief and activating an SFRA VFA flight plan I departed Tipton (KFME) runway 28 at approximately 130 EST for VFR flight to Thomasville, GA (TVI). The flight would have continued to St. Petersburg, FL (SPF). Noted reduced aircraft performance shortly after takeoff - airspeed was ok but climb was lethargic. Turned crosswind and determined to remain in pattern to return to runway 28. Lowered landing gear in anticipation of landing. Engine lost power coincident with turning downwind at 600 - 800 ft. With power loss truncated pattern to land 28 at midfield. Made short radio call. Began turn to final as runway was approached. Recognized that turn would not be completed with available altitude and airspeed, so began to level aircraft and make conscious effort to maintain airspeed accepting straight ahead landing. Right wing of aircraft struck ground - no cartwheel resulted; however, this did result in accelerating aircraft into ground. Aircraft slid forward approximately 100 feet coming to stop on soft ground.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Having already determined to remain in the 28 traffic pattern prior to the engine failure I became fixated on runway 28. A better approach may have been to accept a downwind landing on 10.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Engine failure. Reduced power followed by power loss.
