Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

SUBMERGED IN WATER. LANDED ON THE LONG ISLAND SOUND (SALT WATER).

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On February 20, 2016 at approximately 2040hrs Eastern Standard Time, we departed KFIT for an approx. 95 minutes direct flight to KFRG. We departed to the southwest and climb to 4500MSL direct to KFRG with headwinds of approximately 30-40knots and a groundspeed of approximately 81kts in cruise flight. We continued in cruise flight with no indication of any malfunction of the airplane. Upon reaching KBDR we decided to turn southbound and cross the long island sound this way since it is less of a gap of water between both shore lines. We also began a slow descend over KBDR and upon reaching the area of Port Jefferson we level off at 2000 MSL and this is when we encountered the first spurred of the engine while having the fuel selector on the right tank. I immediately turn the fuel pump on and instructed my student (Ramirez) to switch fuel selector to the left tank and to hold current altitude which was 2000MSL. The spurred of the engine immediately stop at which time I informed the controller that we wanted to proceed to KISP which was only 10NM south from our current location. We flew for approximately 2-3 minutes when the engine spurred on the left tank. We immediately began to lose power and I took control of the airplane and declared an emergency to KISP tower. I immediately made a 180 degree turn to the right and headed for the shore line since it was the best suitable place for landing at the time and I knew from experience that this area is normally clear of any obstacle or houses. As we descended, I was unable to see the shore line due to the darkness and decided to land the plane as close as I could to the shore line judging my distance from the shore line based on the lights of the houses. I held the airplane over the water for as long as I could in order to prevent landing with excessive speed and possibly risking flipping the plane over since this airplane has fixed landing gear. Upon impacting the water, immediately open the door and instructed everyone to exit the airplane and grab the life vest located in the baggage compartment of the airplane. At the time, one of the passenger handed me a life vest while the other passenger jump into the water and began swimming toward the shore line. The second passenger also jumped into the water. None of the passengers had a life vest. Ramirez was the last to jump into the water.
