Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Collapsed nose wheel, prop bent.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Tuesday morning, I called 1-800-WX-Brief, proceeded to the airport, pulled the airplane out of the hangar and did my customary preflight. I called Raleigh Approach on my cell phone and got a void time clearance from KTTA to KLEE.

There was nothing unusual enroute until I was given a lower altitude by Jacksonville to begin my descent from 7000 into Leesburg. Slightly after beginning the descent, I retarded the throttle slightly.

The power dropped dramatically, perhaps to idle RPM. I tried advancing the throttle to full power but power did not return.

I asked Jacksonville for the nearest airport. They gave me a bearing to the nearest airport. I did a right turn on a heading to the airport.

I tried switching tanks, adjusting mixture, and switching mags to left, right, and back to both. I moved the throttle to full and back again several times. Nothing seemed to change engine power. It never seized, just low RPM, maybe idle power.

I decided I could not make it to the airport and deployed the CAPS system at approximately 1000 feet.
