Provide as much detail as possible.</p> <p>During pre-flight there were three baby birds in the cockpit. They were removed. Taxiing and takeoff were normal. At about 100' up I noticed smoke at the base of my feet. I immediately made a hard, diving left turn to return. By then I noticed fire at the left corner near my foot. I tried to stomp it out but couldn't. By then I was over the runway about 20' up, then the smoke became to bad I couldn't see. I landed and was swerving back and forth violently due to disorientation. Eventually I made a hard right turn and the plane stopped and we got out.</p> <p>This was just a pleasure flight of about 30 minutes and we departed about 1:00 pm, I guess.</p> |                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                             |

**RECOMMENDATION (How could this accident/incident have been prevented?)**

Operator/Owner Safety Recommendation

I suppose I better pre-flight would have prevented the accident, but it would have been more than a normal pre-flight.
