Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Leading edge damage to left wing and horizontal stabilizer. Skin damage to lower fuselage and fuel tanks.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On May 19th, 2016 I flew N7781W from Akron Airport (9G3) to Genesee County Airport (GVQ) on a routine training flight. I have been to this airport more than 20 times and I have more than 100 landing there. I have approximately 100 hours of training and all hours have been in this airplane, N7781W.

The weather on 5/19/16 was beautiful, sunny, clear and calm winds.

I was practicing touch and go landings. My first two were normal, but on my third attempt, at rotation speed (approximately 70 MPH) the aircraft pulled hard to the left. I tried to compensate with hard right rudder but this didn't correct the problem. As the plane approached the left side of the runway I saw runway signs. As the plane lost directions control I considered stopping the aircraft, but because I was already at takeoff speed I thought getting above the signs would result in a safer outcome. I attempted to clear the signs but unfortunately clipped them with my wings causing fuel loss and eventually loss of enging power. As i was making a bank to get back to the airport i noticed I was losing fuel out of my wing. The airport perimeter road was my safest place to land. I chose this landing and made a safe landing.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Until I get the plane inspected I don't know if there was a mechanical malfunction. I'm very familiar with the airport and the airplane and I don't know what caused the airplane to pull so hard to the left.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No
