Subject: Statement Aeronca Accident N57 6/1/2016 Approx 9 EST

Mike,

Thank you for the your time and work on this. I will get the log book to you next week along with a copy of my medical certificate.

My statement follows below:

Roger Liembach (student) and I were flying for about 30 minutes and on the last approach I initiated a simulated engine out procedure. He turned a close in base and final as would be expected and lined up for the grass runway. At about 25 feet, I requested that he initiate a go around and asked that he advance the throttle slowly to full power and turn gently to the center of the runway to continue his climb.

As best as I can recall, we were at about 200 feet when the engine quit, momentarily sputtered and then finally went silent. I recall checking the magnetos, carb heat and fuel lever which all appeared to be in proper position. Having used about 2-3 seconds of time, I moved to consider landing options.

I decided that a forward trajectory had more dangers and obstacles such as construction traffic, vehicles, a shallow ravine, electric wires and a busy Newark Rd. I took the controls and turned left 90 degrees positioning us in a trajectory over the hangar for a touch down and rollout on the grass in an uphill direction to dissipate speed and energy.

As we turned and progressed, I realized that we would most likely not clear the top of the hangar and that would be a worse situation. At that point the airplane was losing altitude quicker and heading toward the hangar door. I used the last movement of the stick control to pull the nose in a 45 degree up position to have the engine penetrate the metal door before the fuselage.

I don't remember anything after the impact until I was told by a young woman who was on the scene that I had exited the aircraft on my own. She escorted me through the impacted hangar door to the grass. Roger walked out shortly behind me.

I would like to see the photos and talk with you more about your findings. Let me know when it is acceptable to speak about this incident to others.

Thanks again,

Greg
