Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

UNSURE? MINIMAL TO NONE STRUCTURALLY

HOWEVER, PLANE WAS DESTROYED DUE TO
IMMERSION IN SALT WATER

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The flight was undertaken to maintain piloting skills and to run the engine. There was no particular destination in mind. I thought that I might fly up to Taunton, Mass. ^(KTAN) overfly the field and return to Gabreski (KFOK). I took off from Gabreski about 12:30 PM local time. I immediately climbed to 5,500 ft and headed east to East Hampton Airport (KITO) and circled their airspace w/o entering and was watching the gauges to make sure that everything was in the green (e.s. oil pressure, temp, etc). When everything remained well within limits, I decided to do my KFOK-KTAN run. I almost always ask for flight following, but since I was just meandering I did not contact NY approach. However, I was monitoring 125.97. I flew towards KTAN and just as I was crossing the border of the sound & Rhode Island, I noticed that the propeller RPMs were at 2600 instead of the 2450 for cruise flight. I tried to reduce the RPMs and then heard a "Bang/pop" and oil spit onto the windshield. After taking a

second or two to accept that this was really happening. I contacted NY approach & stated that I had an emergency. The controller immediately radioed back asking who had declared an emergency (because I wasn't established with them). I identified my airplane & position and she gave me a squawk code & asked me to "ident". Since I was probably out of her airspace she couldn't find me immediately and asked if I was "identifying"... before I could respond affirmatively, she found me and asked my intention. After the "bang/pop" the propellers began to spin but the plane was still flying & uncontrollable. I had already turned left towards Westbury Airport & then & told her I was going to try to make an landing there. But as I was speaking w/ her the ~~engine~~ ^{engine} stopped, I informed her of that and indicated that I would never make it there. I had already scannaged the beaches for an open spot (maybe a private beach) and knew that there was no unpopulated area within eyesight. I told her of that and informed her that I was going to bring the plane down parallel to the shore. I had plenty of altitude, so I picked a line (as opposed to a spot) along the shore that I thought was far enough for survivors not to be there, but close enough that I could swim to shore. I parachuted the plane down (no flaps, gear up, passenger door closed) as easily & gently as I could try to keep the nose & prop from hitting the water. Eventually, I heard the water against the fuselage and thought that I was home-free. But then I heard a loud noise and then I perceived the windmill coming at me at a thousand miles per hour. I felt an impact on my head & saw "yellow" for a second. My vision cleared & I unbuckled my seat belt & opened the door & climbed onto

wing of the Bonanza. I knew that I was safe
by then + stupidly started to look for possessions to
salvage. The plane had been floating until then, but
once I opened the door water started rushing in and the
nose started to slip into the water. At that point
I slipped myself into the water + started swimming to
shore.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I have no idea what could have prevented the accident

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
