Subject: N1299J Update

Ma'am, I re-interviewed the pilot on 21 July. He stated the same thing as before that he was cruising along and heard a pop followed by engine failure. He tried to restart twice. He added that he is sure he turned fuel pump off and both magnetos. He does not remember anything else except for being at the hospital. I am closing out my report today, and will amend it later. Can you send me a copy of your preliminary report for my file. Thanks

Michael Salas
