Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

No property damage. Field Corn dented leading edges of both bottom wings. Left Bottom wingtip, outboard of N strut, was damaged. Top of Vertical stabilizer and top of Rudder was bent.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On July 2, 2016, while operating aircraft N6781K, the engine lost power. I had to perform an emergency landing in an agricultural corn field. At Approximately 10:30AM, I just finished spraying a watermelon field in Sussex County Delaware. I was directly South of the intersection of E. Trap Pond Road and Ross Point Rd. At The finish of my last pass in the field, I heard a loud "bang" noise. Immediately after, the engine lost power. I was about 20' or so AGL and heading towards the trees. I committed to an emergency landing and secured the engine controls, aft. I turned into the wind, steered clear of the trees and landing in the surrounding corn. I touched down nice. During the roll out, the airplane settled deeper into the corn and the soft sandy soil. The sandy ground was consistent with beach sand or a sand dune. as the airplane lost forward momentum, the induced drag of the corn and sand caused it to stand up on its nose. The airplane was resting on its nose, motionless, for a brief period. then it slowly rolled onto its back. Had it been a harvested field or tighter soil, the airplane would have rolled out without incident.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

It was determined that FOD cause the wooden prop that drives the spray pump to fail. This caused damage to the engine and effectively shut it down. The FOD was attributed to a bird strike.

We no longer use the wooden props on our spray pumps.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Transland Pump Fan - No other information is available. The part was destroyed.
