SUBJECT: Narrative from July 16, 2016 Concerning Schweizer 300 at KCZL

This statement is being given upon the request of Mr. Hagerty. The request was sent to me via email on July 20, 2016.

NARRATIVE OF EVENTS ON JULY 16, 2016

Travis Gregg and I traveled to KCZL (Calhoun, Georgia) to see Ron Dobbs's MD-500 helicopter. While at KCZL, Mr. Dobbs said we could take his Schweizer 300 for a flight. I indicated that I was not proficient in that helicopter since it had been a while since I had flown in that model. I was particularly concerned about executing auto-rotations. I have previously logged 15 hours in this specific helicopter and 104.3 hours in similar make and model helicopters.

Mr. Dobbs offered to take Mr. Gregg for a flight. They flew for approximately 20 minutes and returned. With the helicopter running, Mr. Dobbs climbed out of the left seat and told me to hop in the helicopter. Mr. Dobbs also said to me, "he's good." I climbed in the helicopter's left seat while the helicopter was still running with Mr. Gregg sitting in the right seat.

Mr. Gregg executed a take-off and flew around the area for about 15 minutes. The time of departure was approximately 12:15 p.m. EDT. No flight plan was filed as far as I know.

Upon return to KCZL, Mr. Gregg executed several set-downs and pick-ups with intervals of hovering in between. This occurred on the taxiway.

Mr. Gregg and I were having a discussion over the intercom system about the engine correlator. Mr. Gregg rolled-up the throttle with the purpose of observing the RPM gauge to distinguish the difference between manual inputs to the throttle and the inputs made by the correlator.

During his throttle roll-up, the helicopter began to shake to the point I became concerned. Based on my experience flying helicopters, I believed we were experiencing ground resonance. It was also my belief that the helicopter's RPMs were so high that shutting-down the helicopter would not prevent the helicopter from shaking apart. Because of my belief, I told Mr. Gregg to pick the helicopter up (take-off).

The helicopter was not taking-off. I reached down for the collective, and it was already being raised by Mr. Gregg. Simultaneously the helicopter continued to shake more and more violently until it ultimately became inoperable. Essentially, the helicopter shook itself apart. The time of this occurrence was approximately 12:30 p.m. EDT.

There was no instruction during this flight. For the duration of helicopter operation, I was seated in the left seat, and Mr. Gregg was seated in the right seat. Mr. Gregg was the pilot in command.
