Statement

I was taxiing my airplane from the terminal to the departure end of runway 33 at Warrenton Fauquier Airport to depart. As I was taxiing, a helicopter on final for runway 33 reported a high wing aircraft off the side of runway 33. I was still about 3000 - 4000 feet away when I saw the airplane nose down in the grass off of the left side of runway 33 and about 1000 feet from the approach end of the runway. I did not witness the accident itself, though. I called Warrenton unicom to report it. I then pulled into the runup block for runway 33, and shut my airplane down to go and render assistance. I ran over to the airplane. The pilot was standing outside the cockpit. He did not appear hurt. I told him to turn off the fuel selector, the master switch and magnetos. He did this promptly. The airport manager arrived on the scene about this time. No further assistance was needed from me, so I returned to my airplane.

Statement

As I turned the helicopter downwind in a right traffic pattern I saw the airplane already nosed over into the ground. I noticed there was no movement from inside the cockpit and I made a call to KTHW/Unicom. On approach, there was a little movement and I witnessed two people climbing out. I returned to the northeast ramp and went into the FBO. Vehicles were leaving for the scene of the accident.
