To: Mr. Michael McElvey

From: Robert T. McCaa

Subject: Aircraft Accident; Reedsville Mifflin County Airport (KRVL) Pa.

Date of Accident: Wednesday May 10 2017 Time; Approximately 1600 hrs.

Aircraft: Avid Flyer N532SE. Built in 1988, 2 place high wing single engine reciprocating.

Fuselage is fabric over steel tube, .035 wall chrome/moly

Wings are fabric over 2 ½ inch aluminum spars with plywood ribs.

Fabric is Stits Process Medium Grade Polyester.

Engine is 582 Rotax, two cylinder/ two stroke cycle liquid cooled 65 hp.

Propeller is three blade Ivoprop 68 inch ground adjustable variable pitch.

Pilot in Command Robert T. McCaa, passenger Thomas C. McCaa, also a pilot.

I (Robert) was in the left seat. We had flown for about an hour, doing aerial maneuvers and demonstrating approaches and take offs. Tom was flying for the purpose of developing familiarity with this model of aircraft, which he had not flown previously.

On the takeoff roll, with Tom at the controls, as the tail came up, the aircraft began to swerve. Overcorrection developed into a severe right hand swerve, and we ran off the pavement at high speed at approximately a 45 degree angle. The runway is bordered on the right side by a grass strip which is used as a grass runway. That is bordered by a drainage ditch, and a hill which slopes upwards. There is then a flat expanse of field which slopes downwards and away from the airport, and a six foot chain link fence.

With the aircraft partially airborne, and being concerned with the ditch, hill, and fence. I attempted to get the aircraft up enough to at least clear the fence. The aircraft ran up the hill, which launched it into the air. We cleared the fence but I was unable to stabilize the aircraft. I attempted a left turn to avoid going near the farm buildings which were some distance ahead of us, and the aircraft stalled.

The left wing struck the ground, followed by the bottom cowling, then the right main gear. As the aircraft rotated to the left, the right main gear was torn from the longeron, and folded back under the fuselage to the left side. The left gear folded outwards, but remained attached. The left wing broke off the front carry-through, and folded back along the fuselage.

Date: 05-15-2017

Subject: Incident Description

Sirs,

On 05/10/2017 at approximately 16:00 Robert T McCaa and I, Thomas C McCaa, were on runway 24 full stop in a side by side dual controlled Avid Flyer (Experimental) Aircraft. I was in the right seat while Bob was in the left seat. While attempting a takeoff from hard surface runway 24, I lost runway alignment and veered right onto grass adjacent to runway. Bob took controls and attempted recovery. I recall climbing a grass ditch and then we were airborne. Shortly after while executing a slight turn to the left, the left wing stalled resulting in a 180 degree rotation pivoting around the left wing tip, impacting the left wing tip, propeller and folding under the landing gear from right to left. The airplane came to rest upright facing back toward the runway.

Thomas C McCaa
