I, Alessandro Longetti, was training David Morales on 5/20/17. Around 16:50, I was training him how to hover on the North Field on the concrete near Runway 9. I was light on the controls with him while he was learning how to hover. When he put an input on the cyclic, it caused the ship to move onto the grass. I didn't want to be aggressive to the ship, so I slowed down until we stopped over the grass. I said to him "We need to go back to the concrete." As we proceeded back to the concrete he made an abrupt movement on the cyclic to the right (while I was on the controls) and the right skid hit an unknown object causing dynamic rollover. I first checked to see if David was ok. Upon verifying that he was ok, I shut the battery switch and fuel shut off valve behind me.

On May 20th 2017, I David Morales began my first introductory flight with my instructor Alessandro Longetti. The accident occurred around 4:50PM, where we were hovering over the concrete to the west of runway 9 approach pattern. I was doing a practice hover and did a left input to the cyclic which shifted us to the left, over tall grass. At this point my instructor Alessandro took full control of the aircraft. He communicated that he wanted to move over to the concrete so he put a right input to go back over to the concrete so we could taxi and park the aircraft for the day. But there was a sudden downward push of wind and that caused a forceful movement to the right causing the skid to get caught on an unknown object leading the aircraft to dynamic roll over to the right. After impact, my instructor made sure we were both okay before turning everything off and cutting the fuel.
