Oct 11, 2016 - 0.2 Simulator training with Scott Montean (hold Entries)

Oct 11, 2016 - 0.7 Flight, IPC with Conrad Hatcher in C-GYSN

The training conducted in from September 19th to October 8th was for his IPC. While it wasn't a requirement he expressed interest in getting some additional training to help bring him back up to standard. On October 8th he did his IPC with Conrad Hatcher and has a partial pass as he messed up his hold. Further training was conducted with Ryan Lefebvre and I and he passed his IPC October 11th, 2016.

In April and May of 2016 during Rifats instructor rating an additional 5 hrs of training was completed on Instruments by me, Scott Montean. During my flights with Rifat we conducted holds and approaches. During sim sessions we also covered departures and arrivals. We also had undocumented ground sessions where we covered IFR knowledge. In my training with him I did not identify any areas of great concern. Early on I had him slow down when entering a hold or conducting an approach. He flew well during departure, en-route, and during approaches. The last training I did with him was showing him some different techniques to determine hold entries.
