

Subject: ForeFlight Re: NTSB Request

Hi Paul,

I found David's account under : he did not file a flight plan with ForeFlight Mobile, but I think you're on the right track with N1839X: we show that as the only aircraft he had entered information about in his ForeFlight account.

Our weather team has gone home for the day but I will check with them tomorrow and let you know if he perhaps got a briefing prior to his flight.

For what it's worth, the last route he entered on 12/26/2016 at 1949Z was 42J to KGKT. He did not look at any weather Imagery (eg: Prog Charts, G-Airmets, Icing levels, etc..) prior to that flight. He may have accessed METARs/TAFs/MOS or other "live" weather information, however we do not log that information.

We will be in touch,
