Hi Ralph-

To answer your question regarding the fuel farm at Skylark, I spoke with a pilot Dan Fredrick who witnessed Janssen and Plourde getting into N8554Y after fueling the aircraft. He told me that each pilot has a key to the fuel farm at Skylark (7B6). There is no fuel log for the fuel farm. He told me that they measured the fuel in the tank after the accident and it was less 8 gallons.
