NAME (S) OF PERSON (S) CONTACTED OR IN CONFERENCE AND LOCATION Sandra Barrett – Carver Aero Operations Manager-		ROUTING SYMBOL INITIALS	
Carver Aero [REDACTED] Davenport, IA [REDACTED] [REDACTED]			
SUBJECT N1804E – NTSB Accident # ERA17FA180			
DIGEST On Saturday May 13, 2017 while at the accident scene I contacted Carver Aero in Davenport, IA as this was reported to be the departure airport of the accident aircraft. I spoke with a Susan Gilmore to inquire about obtaining the fuel records for N1804E and ask if anyone saw or spoke to the pilot Mr. Giammetta on Friday morning before his departure. She stated that Mr. Cremer was the aircraft owner and she didn't know a Mr. Giammetta. She said she would ask around and get with Sandra Barrett the Operations Manager for the fuel information. On 5/16/2017 I sent an e-mail request for the fuel records to Ms. Barrett and then called her on 05/17/2017 to see if they had found anyone who saw or spoke to the pilot. Ms. Barrett stated "she was sending the fuel receipts and the fuel inspection forms." She also said "they know the aircraft owner Mr. Steve Cremer but didn't know Mr. Giammetta. Mr. Cremer keeps his aircraft in a T-hangar in a different area on the field and so far they haven't found anyone who saw the pilot or the aircraft leave on Friday." I asked if there was any way for pilots to receive weather information/forecasts at their facility? She said "pilots can access ASOS & AWOS by calling 309-388-2154 or on frequency 120.175." "They will continue to ask around and let us know if they hear or find out anything else."			
CONCLUSION, ACTION TAKEN, OR REQUIRED			
Fuel information for N1804E received and noted the last fuel invoice from Carver Aero was on 05/04/2017 at 3:27 pm for 17.7 gallons of 100L sold to Mr. Cremer. At present they haven't located anyone who saw the airplane or pilot on Friday morning.
