Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Aircraft destroyed, damage to building.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

This was to be a shared flight with hood time and trading safety pilot positions. We discussed our flight plan to X35. After X35, we then planned on flying VFR to KCGC. From there Marc was to take over as PIC and fly VFR to KINF, KBKV, and then return to KFMV. Total time for this round trip was approximately 2 hours and 45 minutes, not including taxi, landings, and take offs. N199PA was only filled to the tabs by the previous pilot. Our reserves were too close for our comfort so we decided to top off the tanks after verifying the weight and balance was within limits.

Together we performed a thorough preflight inside the hangar before moving the plane, to include sumping the strainer and tanks (all clear). We then pulled the airplane out of the hangar and called Page FBO for fuel. While waiting, we pulled our vehicles inside the hangar and closed hangar door.

After receiving fuel from a Page Field fuel truck, we shook the wings and sumped the tanks for a second time. No water or debris was found.

At this time, I took the left seat and Marc took the right seat.

Engine started normally, checked engine instruments, turned on avionics and received the ATIS for Page Field. I called for taxi and clearance for my IFR flight plan. As I taxied to the E2 intersection, Marc loaded the flight plan into the Garmin 430 and I verified the entries after stopped at the run up area.

Run up- oil temperature, oil pressure, fuel pressure, all in the green at 2000 RPM. Mag check 20/80 drop so I leaned out at 2000 RPM to clean the plugs. While the plugs are being cleaned, we went through the remainder of the checklist items. Verified fuel on right tank, noted the electric trim button missing on the yoke, but verified the manual trim worked, and I trimmed for neutral/take off. Carb heat, vacuum, amps, volts, fuel pressure, oil pressure, oil temperature all in green or okay. Mixture full rich and did second mag check with drops approximately 18 to 20 per side. We both commented on how good that was. Brought throttle to idle.

Pre-take off- Zero flaps, mixture full, carb heat off, fuel pump on, transponder on ALT, AC off, no pitot heat, door locked, landing and strobe lights on, time noted.

Called ready for departure at E2. There was no traffic behind us, so we decided to line up on runway center line and use brakes and full power (2350 +/- RPM) and held for about 10 seconds to check engine performance. Seeing good smooth power, released brakes, accelerated and called air speed alive, applied back pressure at 50 to 55 knots, became airborne at 65 knots, pitched to 5 degrees now at 70 knots with a goal of 80 knots, RPM passing 2450. Near the departure end of the runway we were at 75 knots.

At this point it felt and sounded like a slight loss of full power. Scanned gauges, all in green, mixture full, fuel pump on. RPMs continued to decline. At this point we communicated about changing fuel tanks, so I switched to the left tank, applied carb heat, and checked fuel pressure which was normal, confirmed mags on as the RPMs continued to decline. The engine did not run rough and never sounded like it quit, just did not have enough power to sustain flight.

At this point our vertical climb went to zero as we passed over Metro Pkwy. I called out "this is not looking good, let's do Metro", Marc agreed.

At this time, we were definitely committed to land. We turned towards Metro to make an emergency landing. Marc asked if he should shut off switches, I said yes. I shut off the fuel valve just as the plane struck something. What, I do not know, (I was told a tree). This is my last recollection of flight.

My next memory is crawling on green grass with the strong smell of fuel. I have zero recollection of getting out of the plane. In retrospect, I believe I was thrown out at the point of impact (or before). Immediately thereafter the fire erupted. I ran to the side of building and looked back for Marc around edge of building. I saw a large fireball and heard a lot of popping sounds with no sign of Marc. I paced the area for what seemed like minutes before any help arrived.

RECOMMENDATION (How could this accident/incident have been prevented?)		
Operator/Owner Safety Recommendation		
MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)		
Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No <i>(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)</i> Unknown reason for power loss on initial climb.	Total Time/Cycles On Part _____ Hours _____ Cycles Time Since This Part Inspected/Overhauled _____ Hours	
FUEL & SERVICES INFORMATION		
Fuel on Board at Last Takeoff <i>(Convert from pounds, as necessary)</i> 47 _____ Gallons	Fuel Type ☐ 80/87 ☒ 100 Low Lead ☐ 100/130 ☐ 115/145 ☐ Jet A ☐ Jet A-1 ☐ Jet B ☐ JP8 ☐ Automotive ☐ Other, specify _____	
Other Services, if Any, Prior to Departure Top off fuel from tabs by Page Field fuel truck.		
EVACUATION OF AIRCRAFT		
Was an emergency evacuation of the aircraft performed? ☐ Yes ☒ No		
Method of Exit – Describe how the occupants exited and how many occupants evacuated each location I believe I was ejected. No recollection of exiting aircraft. Could not locate other pilot.
