NARRATIVE

ON 10-19-16, at approximately 07:25 hours I was dispatched to an airplane crash off of the east end of the George T. Lewis airport. As I approached the airport bridge I was flagged down an individual who had observed the crash. WITNESS relayed Chief Robert Robinson, CKVFD and myself to the scene of the crash, which was in Tyre Creek. Upon arrival at the crash site, I made contact with 3 W/M's, Joseph Greene (pilot) Joseph Allen, (R/F passenger) Charles Barry, (Rear seat passenger), all had minor head injuries. The VICTIMS were assisted into the boat and returned to shore. I inquired as to what happened and all VICTIMS stated the plane seemed to have lost power and stalled. The VICTIMS were treated Levy County Rescue #5 and signed transport refusals. I made contact with Mike Singleton, FAA, and advised him of the situation. While FAA was responding, I made contact with BJ Johnston, Florida Wildlife Commission and requested assistance accessing the crash site once FAA arrived. Upon arrival of FAA, the scene was released to them. During follow up investigation, I spoke with two witnesses, whom requested to remain anonymous, who relayed they had observed the aircraft attempt to take off once, but upon reaching approximately half way down the runway, aborted it's attempted and turned around and attempted to takeoff once again. Witnesses stated the airplane engine sounded like it was sputtering as it accelerated. Upon reaching approximately 50 feet in the air, the plane banked to the left and struck the water. All further inquiries were turned over to the FAA.

On 1/11/2017, via email, Police Chief Sandlin clarified that the witnesses' observation with regard to the engine sounding like it was sputtering, was during the first (aborted) takeoff attempt.
