NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was coming from north and entered a left downwind for runway 28 at KART at 1200' MSL. I use landing gear as a speed brake and so put down the landing gear handle and observed a green light. It has a single green light. I put in 15° flaps on downwind, 30° on base, a 40° on final. My approach speed was 75 kts. Wind was 340° at 7 kts, and 30.26 altimeter. When I flared, I heard a "pop" from right side of fuselage. Shortly afterwards I touched down on pavement, the left main seemed to drag and pull aircraft to left. The plane abruptly slid and skided off runway at 45° angle and slid on grass about 40' feet. The wings remained level till almost to a stop when aircraft tilted right. The nose gear remained extended and the engine and propeller were still functioning. I pulled off mixture, and shut off master switch, mags, and avionics master.
