Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. Re: statement of events leading up to the incident on 11/08/16 with my C177B, N30703. After having done the normal preflight check, stuck the tanks, checked the oil etc. no issues. I left KIJD at approximately 2:00pm for a flight to O8R which is about 28nm away, flying along, everything was normal, nice clear day, I was flying at about 1800 ft. When I got within 7nm of my destination at about 2:15 pm, suddenly everything changed, the engine quit. I immediately spotted a field to my right that looked ok, border line in length but smooth, seemed to be best option. I tried the whole procedure to get the engine started but failed, so I proceeded to make the approach for the field, slowed the plane down as much as I could, gave it full flaps, set it down on the field, but as this plane likes runway I did not have enough to get stopped, I steered to the least amount of trees and nosed it between 2 small trees, another 30 ft. and things would have been different. No Passengers, no injuries.
