

MEMORANDUM OF RECORD

Investigator Name
Air Safety Investigator
Eastern Region

Date: December 19, 2016
Person Contacted: David Hultman (Pilot)
NTSB Accident Number: ERA17LA048

Narrative:

Pilot informed me that due to his injuries and lack of a computer that would open the 6120 report, I completed the report via telecom.

I spent 20 minutes over the phone asking him the 6120 report questions.

I sent him the completed report and asked him to make any edits/corrections to which he declined. He reviewed and acknowledged the report and sent me an email confirming this.

Aaron,
I have reviewed the report and as we discussed this response serves as my signature and approval.
David R. Hultman

Dave, per our conversation. I filled in the blanks and signed the bottom on behalf of your report to me. Please respond back with an acknowledgement or any edits/corrections. There are 2 reports. Both the same except we redact signatures and certificate information.

Thanks
Aaron

Subject: Re: NTSB

Hi Aaron,
Really appreciate your understanding on my condition. Haven't checked to see if this will work on my kids computers but I wanted to get this narrative off to you as soon as possible. More to follow:
