NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Flight began with an aero tow up to 3000 feet AGL. Disconnect was uneventful and I stayed between 2500-3000 feet AGL for approximately 10 minutes catching thermals. I then continued my descent to enter a left down wind for runway 18. Because of the concussion I received upon landing I do not remember anything from the time I turned from left downwind to left base and when I came to rest on the ground. The glider came to rest against a tree in an upright flat normal orientation. The main wings were badly damaged, however the fuselage and empennage are in good condition. I immediately tried to call my tow pilot on the radio but he began calling me on my cell phone and came to the rescue.
