Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

hit wood fence . substantial damage to right wing and most of airplane including prop strike.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Wednesday march 29th 2017. Pulled plane out of hanger by hand mid-morning. Washed and done a good inspection. Plane had not been out of hanger in several months. Came back around 1:00 pm completed preflight inspection. Loaded baggage, one passenger, and myself. Started airplane and let it warm up. taxi from 18 end of runway to the 36 end. Plane had approximately 47 gallons of fuel on board with about equal amount in each tank.. fuel selector was on both tanks. Everything checked normal on runup. Weather was clear. Winds were light and windsock indicated slight wind from the northeast. This is my home base field. I had many take offs and landing on field. At the point where I normally have airspeed for lift , I realize something was wrong. I told my passenger we had a problem. We were not going to make it out and I didn't have enough runway to stop. Get prepared. I felt my best option was to try to avoid hitting anyone and any property. I pulled up just as I reached the fence and headed toward an opening to the right. It sat down in the board fence between the runway and house clipping several wood posts and came to a stop just feet from parked vehicles and house. Front landing gear was knocked off and plane was on main gear and front cowling. All power was turned off, fuel selector was turned to off position, elt was turned off, both doors were able to open , passenger and pilot were able to get out with no injury and not even a scratch. Thank the lord !!! Wife and grandchild were in yard and watched . Said they had no time to even move out of way .

RECOMMENDATION (How could this accident/incident have been prevented?)

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Not sure what caused the issue. Engine sounded like normal without any noticeable abnormality. Was not able to remember any performance details due to the short time span.
