NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We took off from Cedar Key (KCDK) at approximately 8:25 EST PM. The runup went without an issue and everything appeared normal on the ground. We took off and climbed to 5540 feet. Approximately 15 minutes after take off, we experienced engine failure that was accompanied w/ a violent shake. Immediately after failure, I declared an emergency on 121.50 and squawed 7600 (I know the correct code is 7700, but I typed in 7600 on accident). We were over land so I had to glide back to the water due to the fact that the only thing under me were trees, swamps, and an unlit highway (I do not remember how far from water we were, I just remember that it was the only option as KCGC was approximately 16 miles from where our engine failed). From failure to impact only 4 minutes passed. The nearest airfield was too far to glide to (KCGC). After four unsuccessful restart attempts on the way down, we landed just off the Yankeetown boat ramp w/ no injury to pilot/passengers. The weather was very clear with light wind. The ceiling (if I remember correctly) was overcast at 12000 feet. That overcast layer, however, was enough to block any moon light so landing in the pitch black water was a real challenge.
