Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

landing gear collapsed up under leading edge of wing.
leading edge skins on both wings dented.
engine mount bent
canopy broken

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Left Leesburg at around 8:30 am eastern time on route to Martinsville, VA. After about 10-15 minutes in flight, the weather was deteriorating and so I decided to return to Leesburg airport. On about a 3/4 mile final for runway 35 at JYO, the engine stopped running. I tried several times to restart the engine, but it would not restart. I was at about 700 ft above the ground when the engine stoppod. I was able to clear the trees just south of the runway and put the plane down in a field. I was not injured.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Not sure what caused the engine to stop running, so not really sure how I could have prevented the accident.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
 (If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

I am not sure how to answer this. If it was carburetor ice that caused the engine to stop, then it was not mechanical.

I broke the canopy with my feet and climbed out. The canopy locking mechanism was jammed, so I had to break the canopy to exit.
