Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)			
There is no damaged to other property.			
NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)			
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. First of all, I took off from Lakeland Regional Airport around 11.45 am on Tuesday. After two hours flight, I landed at Lake City Airport to get fuel and take a short break. I took off from Lake City Airport around 14.40pm. I picked up VFR flight following from Jacks Center at 3000feet. My final destination was Heart of Georgia Regional Airport. Nearly 45 minutes later, I heard some unusual sound from the engine. Immediately, I checked the RPM indicator and it started to decrease to 1500RPM. First, I thought that carburetor icing might be the reason of that. I turned carburetor heat on however nothing changed. I also checked the fuel valve and primer but nothing was wrong. After all that, light smoke started to come from the engine and into the cockpit. At the same time, a small piece of debris that I believe may have been from the engine or cowling hit the windshield. At that point, I understood that something was going wrong with the engine and I was not able to fix it. I declared emergency landing to Jacks Center. They told me that nearest 8 mile away from me. I knew that I couldn't make it. I reported them I have to land as soon as possible otherwise fire might be started. After all these communication, I started to apply emergency landings procedures. I knew that the most important thing is set to airspeed to best glide speed. Once I set the airspeed for best glide speed, I started to look for the most suitable landing area with the smoothest and longest surface. First I looked down, I was over trees area. But beyond this trees area, I saw long and smooth field. I started to glide and descend to that field. Meanwhile, I checked the fuel, carburetor and primer again. When I was approaching the field area, Jacks Center asked me for any help after I land. I said that I want it. Communication was finished and I was ready to land. Before landing, I turn the master switch off. Main gear was touched down first and I tried to add back pressure to keep weight off the nose. However the surface was soft and rough. After 4 or 5 seconds, the nose gear touched down. Once the nose gear touched down, the aircraft flipped over and stopped. Immediately, I unfastened my seatbelt and shoulder harness and opened the door. Because I thought that still I might be in dangerous situation. I started to run away from airplane to reach

a safe distance. Nearly 15 or 20 minutes later, Soldiers came by helicopter to offer assistance. They then proceeded to call the local emergency services including the Sheriff and Fire Department who checked everything and assessed the site of incident in order to declare it safe. They helped me ~~around~~ to surround the aircraft with tape to ensure that no members of the public would attempt to approach it until investigation had been completed. After this the Sheriff took me to his office to take copies of all of my documentation. After this, I contacted my flight school who advised me to take my way to Waycross airport to be picked up and returned to my place of residence.

At the time when the incident occurred, I was flying over an area covered by trees offering me a very limited choice of best places to land. It became clear to me that there was a serious mechanical failure with the aircraft and it was clear that I could not perform any corrective action to control this. I therefore exercised the emergency procedures to best of my ability, however due to the surface on which I was forced to land I was unable to bring the aircraft to a controlled stop. However I practiced the best safety given circumstances. I also feel that prior to departing on this flight I thoroughly inspected the aircraft in accordance with pre-flight procedures. I ensured sufficient fuel was on board and I added 1 quart of oil. I also carried spare oil with me on the journey to be added as required.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
