Re: EVENTS of night of May 16, 2017
plane crash

- Due to the fact that I had to leave for work (Newark Airport) at 1:30am, I was in bed early. Around 8:30-8:45pm I was awoken by a loud crash sound. I got up + looked out of my bedroom windows which face the street, & could only make out something red which I assumed was a car that crashed into the trees on the side of my yard. I then saw a man walking up my driveway. He rang my doorbell but I did not answer bc I was home alone. I called my neighbor Bernice Colombo, [REDACTED] just to let somebody know I was going to answer the door. She didn't answer. I looked out of the window again + saw the man walking back down my driveway. This is when I first noticed the heavy thick smell of fuel.

CATHA COLO

I went outside & when I got to the middle of my driveway I heard a crackling fire sound & smelled fuel. The fuel smell was very strong. I didn't see any flames.

I saw the pilot & my two other neighbors, Michele Paccione & Bernice Colombo speaking to each other.

Shortly after, emergency vehicles arrived.

[REDACTED]
