Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft damage to engine as plane impacted directly downward. Total loss. Electrical wires also damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

please see attached page

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

pilot did everything possible to remedy
the engine issue. Unable to restart.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Date Report Received

07/30/2017

I arrived at KFMY at approximately 830am on 07/07/17. I performed a thorough preflight which included all 3 gas sumps. I observed a small amount of water in the lower sump. I checked it several more times to make sure no water was present. I then gently rocked the plane by the wings several times and also lifted up and down on the tail to make sure any water in the tanks would move to the lowest points. After a short time I then checked all 3 sumps again and no water was observed. I checked both fuel tanks which were near full.

The engine started on the first attempt and all gauges showed in normal range. I obtained ATC clearance for a NW departure VFR and was directed to Runway 13. I performed a complete run up before takeoff and no issues were observed. I took off and departed to the NW. I flew over North Cape Coral and then flew south over Pine Island Sound.

I was cruising at around 1,200 feet over the south end of Pine Island Sound when the engine had a slight loss of rpm. I immediately changed course to return to KFMY. I applied carburetor heat with no change and also tried both mags with no change either. Engine continued running rough. I made sure the fuel was on for both tanks. At this time I was over south Cape Coral at approximately 800'. Altitude was holding and I was scanning for appropriate places to perform a forced landing with not any good options.

My plan was to return to KFMY. At that time the engine stopped. I trimmed for appropriate glide and attempted to restart the engine with no results. I notified ATC that I was going down. I picked out what looked like a possible landing area on a street and began a controlled descent. I then struck wires and the nose tilted down and slammed into the ground. The plane flipped over. I released my seat belt, kicked open the passenger door and got out of the plane. I crossed the street and sat down on the grass. Emergency responders arrived and I was transported to Lee Memorial Hospital as a Trauma Alert. It was found I had sustained a broken pinky finger on my left hand and a deep laceration on my right hand near my thumb. I also had numerous cuts on both hands. I was released from the Hospital on 07/08/17 in the afternoon and my recovery is progressing well.
